President reported on the Company's performance for the year 2017 as following;

### **Business in Thailand**

#### **Textiles Business**

The overall situation of domestic business, the Company has maintained the sales revenue amid the vulnerable economies of trade partners countries. However, the higher price of raw material has become a cost-push factor coupled with the appreciation of Thai baht late last year, causing a slight decline in operating results of the Company's textiles business.

#### **Rubber and Rubber Products**

Due to the Company's high-quality rubber products, demand from the customers for this product remained strong. The Company has given effort in researching and developing new products over the past year, and the sale revenue was sustained. However, the natural rubber prices were higher than those in 2016. This, coupled with the higher global prices of crude oil and the appreciation of Thai Baht has slightly lowered the business' operating results.

#### **Plastic Business**

Major clients of plastic products of the Company are in the automobile and motorcycle industries. However, the competition in the plastic injection industry was intense, and the companies have handled the situation by adopting the new technology to produce products to accommodate the demand of customers. The Companies have to improve their competency continuously. Over the past year, the business's operating result was slightly declined.

#### **Stainless Steel Product**

In the previous year, the Company has expanded the production capacity; however, it could be unable to ramp up its additional capacity to the maximum level. Also, because most of the sales of stainless steel products come from the export market, resulting in adversely decreasing sales revenue and profit. The production's efficiency improvement is the significant part to be focused to offset the shrinking of income caused by the currency exchange rate.

#### **Trading Business**

For the IT products, the Company has been trusted to be the distributor of IT products by various brands as it could serve the multiple demands of customers in the public and private sector despite the fierce competition. With the team's determining and their credibility among the customers, the Company could maintain profit margin impressively.

#### **Hotel Business**

The Hilton Hua Hin Resort and Spa has been renovated continuously under the plan the Company had informed the shareholders last year. The Company foresaw the future benefit from the renovation even though its operating results declined in 2017 due to the partial closure of services. The Company was confident in the vast potential of the hotel that it would generate prominent returns to the shareholders in the future.

### Hospital Business

The development of the Ruam Jai Rak Hospital at Sukhumvit 62 was still slow in line with the slow progress of an Environment Impact Assessment (EIA) study concerning the civil society part. The Company has expected the process to finish by the end of 2018. The construction would take times of around two years thus, it is expecting to be ready to open for services in late 2020. During late of the year 2017, the Company has considered to invest in 25% shareholding of the KPN Healthcare Public Company Limited (KPNH). The KPNH would operate the hospital business located at Ratchada-Ramintra and Nual Chan Road intersection; one of the high-income group residential location. The Company has foreseen it as the high potential investment. The hospital is expected to open in late 2019 or early 2020.

### Business in China

#### Energy Business

The energy business is the Company's main business in China. Currently, the power plants in Shangyu and Jiashan's operating results were improving compared with the previous year due to the increasing demand of steam among the industrial manufacturers, despite the higher prices of coal, its main raw material. Also, the higher demand was driven by the Chinese Government's policy in prohibiting the manufacturers to use small boilers at their sites. However, the investment for environmental protection was increasing along the line. For the Yunnan Energy Luliang-Union Power Co., Ltd (Luliang-Union) in Yunnan, the Company increased the amount of the provision for the losses on impairment of investment in 2017 by Baht 41.7 million, resulting in the full amount of the provision for the losses on impairment of investment in the Company's financial statements. The move was due mainly to the long-time loss in operation of the business and the better returns in the future was unable to predict.

#### Real Estate Business

Early in the year 2017, the Company disposed of its investment in Zhejiang-Union Property Co., Ltd, resulting in a gain from the disposal of investment of Baht 43.7 million. However, in the fourth quarter, the Company, through a 99.98-percent-owned subsidiary, has invested approximately Baht 180 million in 24% of Zhuji Union Real Estate Co., Ltd (Zhuji Union). Zhuji Union will invest in a 35.46 MU or approximately 15 rai real estate development project located in Zhuji City, Zhejiang Province, near Xiaoshan District in Hangzhou City. The project is under a designing process which will be submitting to the authority to seek the construction approval. It is expected to take around two years to be ready to complete and sell.

#### Other Businesses in China

The other businesses in China such as the chemical industry business whereas the Company produces the Phthalic Anhydride, the Company has to invest further in environmental preservation to meet the mandatory requirement. In 2017, the Company managed to boost revenue and maintain cost, resulting in higher operating profit.

The Company's performance of the year 2017 according to the financial statements is as following;

According to the consolidated financial statements of the year 2017, the Company's total revenues was Baht 12,073 million, a decrease of Baht 168 million or 1.4%,

Certified Public Accountant No. 6140 of EY Office Limited to be the 2018 Company's Auditors. The remuneration for auditing the Company's accounts including the reviewing of the 3 quarter of the financial statements would be at a rate of Baht 2,700,000.- (identical with the year 2016) and no other service charges with the following votes: For : 194,464,416 votes, Against : 0 vote, Abstention : 3,000 votes and voided ballot 0 vote.

The Chairperson announced that the meeting has now been concluded and would welcome any questions or comments from the shareholders.

Mr. Narongsak Mekmasin, a shareholder, asked about the slow progress of the development of Hospital project in Sukhumvit Soi 62 and is there any chance of the project's Environment Impact Assessment (EIA) report to get the approval from the authority within 2018? Also, he asked if the Company would have a plan to recruit the medical personnel including the medical doctor, specialized doctor and medical staff which is quite limited to work at the Hospital. As currently, the Government has promoted the Eastern Economic Corridor (EEC) development project, Mr. Narongsak asked if the Company has the policy to invest in the EEC project or not.

The President replied that the Company has no investment plan in the EEC project at present. Regarding the question about the slow progress of Ruam Jai Rak Hospital at Sukhumvit Soi 62 project development, it was caused by the EIA especially the civil society study which has not yet finished since many residents are living in the surrounding community. Therefore, the Company has to take relatively long time to solve the issues and ease the concerns of people in the community; however, the Company did not see significant issue that will hinder the EIA approval. Anyhow, the process is time-consuming. Until now, the management has expected the issue will be easing soon, and the EIA should get approval from the authority within the end of 2018 and will be ready to open by late 2020.

On the medical personnel, usually the medical specialists would have schedules at several hospitals, and there are large numbers of medical doctor graduates yearly. They have different levels of expertise. The newly open hospital may still have a few patients, but it still needs to create the appropriated offers to the medical doctors.

Miss Irarom Anant and Mr. Somboon Udomdirekruek, shareholders, asked about details of the Company's investment in Luliang-Union Power Plant included the plant's capacity, the investment capital, when the joint venture has begun and has the project ever been making a profit since? Also, previously, the Company used to record the gains on disposals of investments, for this power plant, how long the Company would take to decide whether to dispose the investment or dissolution.

The Chairperson replied that the Company had started to invest in China since 1994 when the country just opened up. The Company invested in many power plants; the successful one has been expanded while the unsuccessful one was sold. The overall investment did not do any significant damages. The 50-megawatt Luliang-Union Power Plant was one among the first investments of the Company. As the plant located at the coal mine mouth, the plant has an advantage on the lower logistics cost. Initially, the project reported the favorable operating results, but later there were many changing factors such as the coal prices, the regulations issue and the Government's support, causing the Luliang-Union to record the operating losses for a long time continuously. There have been attempted to sell the plant or

(Translation)

seek after the interested investors or close down the operation if it could, however, it has not yet succeeded. Eventually, in 2017, the Company set a provision for losses on impairment of investments at the full amount. Currently, the plant is still operating since the plant's output is supplied to the local community. The Government is concerned about the potential impact on the local community; therefore, it is essential to keep its operation. Also, the Company is unable to decide without consensus decision-making of the Chinese partner.

The President replied that in 2017 the Company already set a provision for the losses on impairment of investment at the full amount, therefore, if the Luliang-Union Power Plant reports an operating loss, the Company will not require to book that loss, and there is no effect on the financial statement. Also, since the Power Plant has remained operated, if, in the future, the Plant could improve its operating results, the item might be able to turnaround to be profit realization.

The Chairperson assigned Mrs. Srinual Sombatpraiwan, Account and Finance Department Manager to answer further the shareholders that total capital investment in Luliang-Union Power Plant valued of Baht 500 million, Baht 400 million of total invested by the Company and its subsidiary invested the remaining of Baht 100 million.

Miss Irarom Anant, a shareholder, asked the Auditor for further knowledge of the assets' fair value measurement. According to the Annual Report of the year 2017 on page 191, the Company disclosed the assets in which the fair value was at Level 1 and Level 3, why there is no Level 2 and what are differences of each level of fair value?

The Chairperson requested Mr. Khitsada Lerdwana, the Company's Auditor to answer the shareholders on that all assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy into three levels based on categorizing of input to be used in fair value measurement. The definition of each level was disclosed in the Annual Report of the year 2017 on Page 132, including Level 1; use of quoted market prices in an observable active market. Level 2 and 3; use of other inputs such as using cash flow to evaluate investment property, etc. For the Company, there is no Level 2 which uses observable inputs. For example, the land appraisal can be done by using the current selling price of the adjacent, similar piece of land.

The Chairperson summarized each agenda's votes to the meeting and opened for questions and answers sessions for the shareholders or if there are any suggestions before ending the meeting.

Mr. Rangsan Ngarmprasertpong, a shareholder, asked for the details of the Annual Report of the year 2017 as follows;
